SUBJECT INDEX

Abortion

Abusive men and abortion, FYI, p. 228.

Do depression and low self-esteem follow abortion among adolescents? Evidence from a national study, Warren JT, Harvey SM and Henderson JT, p. 230.

Medicaid funding for abortion: providers' experiences with cases involving rape, incest and life endangerment, Kacanek D, Dennis A, Miller K and Blanchard K, p. 79.

Medication abortion, Italian style, FYI, p. 4.

Medication abortion works even after 63 days, FYI, p. 145.

Obesity linked to elevated risk of unintended pregnancy, abortion, STDs, see **Reproductive Health**.

Obstacles to the integration of abortion into obstetrics and gynecology practice, see **Service Providers**.

Parental consent for abortion and the judicial bypass option in Arkansas: effects and correlates, see **Law and Policy**.

Which image is better? FYI, p. 73.

Contraception: General

Research priorities for preventing unintended pregnancy: moving beyond emergency contraceptive pills, Roundtable, Trussell J, Schwarz EB and Guthrie K, p. 8.

Contraceptive Practice

Women's odds of dual contraceptive use vary by their choice of highly effective method, Digest, p. 133.

Emergency Contraception

Advance EC provision has few benefits, FYI, p. 73.

Emergency contraception use among the *Twilight* set, FYI, p. 229.

New method is as effective as levonorgestrel after unprotected intercourse, Digest, p. 134.

Evaluation of Programs

Impact of an intervention to improve contraceptive use through follow-up phone calls to female adolescent clinic patients, see **Teenagers**.

Middle school prevention program reduces risk that youth will begin sexual activity by ninth grade, Digest, p. 138.

Theory-based abstinence-only intervention may delay sexual initiation among black urban youth, Digest, p. 135.

What's key in programs for black women, FYI, p. 5.

Fertility: Planning and Effects

Distinct profile found among women ambivalent about becoming pregnant, Digest, p. 216.

Exploring variation in teenage mothers' and fathers' educational attainment, see **Teenagers**.

Pregnancy intentions and teenage pregnancy among Latinas: a mediation analysis, see **Teenagers**.

Repeat unintended, unwanted and seriously mistimed childbearing in the United States, Wildsmith E, Guzzo KB and Hayford SR, p. 14.

Unintended births: patterns by race and ethnicity and relationship type, Guzman L, Wildsmith E, Manlove J and Franzetta K, p. 176.

Valid and precise measurement, Letter, Barrett G, Morof D and Rocca CH, p. 220.

Government Policy, Programming and Funding

A match made in heaven? FYI, p. 4.

Medicaid funding for abortion: providers' experiences with cases involving rape, incest and life endangerment, see **Abortion**.

Hormonal Implants and Injectables

The price is right, FYI, p. 73.

Intrauterine Devices

How to drum up interest in the IUD? FYI, p. 229.

Law and Policy

Parental consent for abortion and the judicial bypass option in Arkansas: effects and correlates, Joyce T, p. 168.

Males

Gay and bisexual men are largely receptive to HPV vaccination, see **STDs**.

History of forced sex and recent sexual risk indicators among young adult males, see **Sexual Behavior**.

Sexual partner selection varies by race among men who have sex with men, see **Sexual Behavior**.

"We're the heroes!": fathers' perspectives on their role in protecting their preteenage children from sexual risk, see **Marriage and the Family**.

Marriage and the Family

Family discussions about contraception and family planning: a qualitative exploration of black parent and adolescent perspectives, see **Teenagers**.

"We're the heroes!": fathers' perspectives on their role in protecting their preteenage children from sexual risk, Wilson EK, Dalberth BT and Koo HP, p. 117.

Maternal and Child Health

Down diagnoses on the rise, FYI, p. 5.

Who picks the habit? FYI, p. 145.

Oral Contraceptives

Now for some good news, FYI, p. 145.

This is your brain on the pill, FYI, p. 229.

Pregnancy and Childbirth

Consensus backs VBAC, FYI, p. 73.

Do your neighbors affect your birth outcomes? FYI, p. 144.

Fertility after miscarriage, FYI, p. 4.

How safe are home births? FYI, p. 72.

It could give you an ulcer! FYI, p. 73.

Most pregnant women are not as physically active as is recommended, Digest, p. 218.

Pregnant and depressed? New way to deal with that, FYI, p. 72.

Program helps pregnant women reduce exposure to secondhand smoke, Digest, p. 215.

Racial disparities in stillbirth risk are greatest at preterm gestational ages, Digest, p. 68.

Short interval between miscarriage and conception is linked to best outcomes, Digest, p. 278.

Public Opinion
"Prolife" vs. "prochoice": labels run neck and neck, FYI, p. 144.

Reproductive Health
Behavioral research on biomedical sexual health technologies: opportunities and directions, Roundtable, Zimet GD, p. 12.

Disability and Pap smear receipt among U.S. women, 2000 and 2005, Drew JAR and Short SE, p. 258.

Obesity linked to elevated risk of unintended pregnancy, abortion, STDs, Digest, p. 276.

Service Providers
Abstinence and teenagers: prevention counseling practices of health care providers serving high-risk patients in the United States, Harper CC, Henderson JT, Schalet A, Becker D, Stratton L and Raine TR, p. 125.

Adolescents may not always receive essential reproductive health services from their pediatrician, see **Teenagers**.

Barriers to screening for intimate partner violence: a mixed-methods study of providers in family planning clinics, Colarossi L, Breitbart V and Betancourt G, p. 236.

Disability and Pap smear receipt among U.S. women, 2000 and 2005, see **Reproductive Health**.

Family planning service delivery research: a call to focus on the dynamics of contraceptive use, Roundtable, Hock-Long L, Whittaker PG and Herceg-Baron R, p. 10.

Impact of an intervention to improve contraceptive use through follow-up phone calls to female adolescent clinic patients, see **Teenagers**.

Lowering the risk of secondary HIV transmission: insights from HIV-positive youth and health care providers, see **STDs**.

Obstacles to the integration of abortion into obstetrics and gynecology practice, Freedman L, Landy U, Darney P and Steinauer J, p. 146.

Physicians who vaccinate females against HPV support male vaccination, Digest, p. 277.

Sex Education
Parental sex ed waning, FYI, p. 144.

Sexual Behavior
Asian and Pacific Islander teenagers' risk profiles vary among ethnic groups, see **Teenagers**.

Body image predicts some risky sexual behaviors among teenage women, see **Teenagers**.

Characteristics associated with sex after periods of abstinence among sexually experienced young women, see **Teenagers**.

Concurrent partnerships and high-risk HPV: link varies by race, ethnicity, see **STDs**.

Daily participation in sports and students' sexual activity, see **Teenagers**.

Death of a spouse may be associated with increased STD diagnosis among older men, see **STDs**.

Former foster care youth may face increased odds of STDs, risky behaviors, see **Teenagers**.

Heterosexual anal sex experiences among Puerto Rican and black young adults, Carter M, Henry-Moss D, Hock-Long L, Bergdall A and Andes K, p. 267.

History of forced sex and recent sexual risk indicators among young adult males, Smith LH and Ford J, p. 87.

Increased risks found among heterosexual women with a recent female partner, Digest, p. 278.

Lack of awareness of partner STD risk among heterosexual couples, see **STDs**.

Sex redefined: the reclassification of oral-genital contact, Hans JD, Gillen M and Akande K, p. 74.

Sexual intercourse and oral sex among public middle school students: prevalence and correlates, see **Teenagers**.

Sexual partner selection varies by race among men who have sex with men, Digest, p. 214.

Sexual values and risky sexual behaviors among Latino youths, Deardorff J, Tschann JM, Flores E and Ozer EJ, p. 23.

The association of socioemotional problems with early sexual initiation, McLeod JD and Knight S, p. 93.

The contexts of sexual involvement and concurrent sexual partnerships, Paik A, p. 33.

What you never knew about swinging, FYI, p. 228.

Withdrawal attitudes and experiences: a qualitative perspective among young urban adults, see **Withdrawal**.

STDs
A winning combination, FYI, p. 5.

Black adolescent females may benefit from STD interventions tailored to gender and culture, see **Teenagers**.

Concurrent partnerships and high-risk HPV: link varies by race, ethnicity, Digest, p. 137.

Congenital syphilis rising, FYI, p. 144.

Current partner's HPV status is the strongest predictor of HPV infection, Digest, p. 133.

Death of a spouse may be associated with increased STD diagnosis among older men, Digest, p. 64.

Former foster care youth may face increased odds of STDs, risky behaviors, see **Teenagers**.

Gay and bisexual men are largely receptive to HPV vaccination, Digest, p. 218.

HIV testing on the rise? FYI, p. 229.

HPV vaccine is widely available, but many doctors do not recommend it for young adolescents, Digest, p. 275.

Lack of awareness of partner STD risk among heterosexual couples, Witte SS, El-Bassel N, Gilbert L, Wu E and Chang M, p. 49.

Lowering the risk of secondary HIV transmission: insights from HIV-positive youth and health care providers, Leonard AD, Markham CM, Bui T, Shegog R and Paul ME, p. 110.

Obesity linked to elevated risk of unintended pregnancy, abortion, STDs, see **Reproductive Health**.

Rates of HIV infection higher among Hispanics than among whites tested at CDC-funded sites, Digest, p. 214.

70% HPV vaccine coverage not likely any time soon, FYI, p. 228.

STDs among the Viagra set, FYI, p. 229.

STDs in Eastern Europe, FYI, p. 72.

The HPV vaccine may be underutilized by certain subgroups of insured youth, Digest, p. 136.

Well, that didn't take long, FYI, p. 4.

Where the boys are, FYI, p. 72.

Teenagers
Abstinence and teenagers: prevention counseling practices of health care providers serving high-risk patients in the United States, see **Service Providers**.

Adolescents may not always receive essential reproductive health services from their pediatrician, Digest, p. 217.

Asian and Pacific Islander teenagers' risk profiles vary among ethnic groups, Digest, p. 64.

Black adolescent females may benefit from STD interventions tailored to gender and culture, Digest, p. 66.

Body image predicts some risky sexual behaviors among teenage women, Digest, p. 67.

Characteristics associated with sex after periods of abstinence among sexually experienced young women, Ott MA, Ofner S, Tu W, Katz BP and Fortenberry JD, p. 43.

Daily participation in sports and students' sexual activity, Habel MA, Dittus PJ, De Rosa CJ, Chung EQ and Kerndt PR, p. 244.

Do depression and low self-esteem follow abortion among adolescents? Evidence from a national study, see **Abortion**.

Exploring variation in teenage mothers' and fathers' educational attainment, Mollborn S, p. 152.

Family discussions about contraception and family planning: a qualitative exploration of black parent and adolescent perspectives, Akers AY, Schwarz EB, Borrero S and Corbie-Smith G, p. 160.

Former foster care youth may face increased odds of STDs, risky behaviors, Digest, p. 276.

HPV vaccine is widely available, but many doctors do not recommend it for young adolescents, see **STDs**.

Impact of an intervention to improve contraceptive use through follow-up phone calls to female adolescent clinic patients, Kirby D, Raine T, Thrush G, Yuen C, Sokoloff A and Potter SC, p. 251.

Lowering the risk of secondary HIV transmission: insights from HIV-positive youth and health care providers, see **STDs**.

Media damage control, FYI, p. 229.

Middle school prevention program reduces risk that youth will begin sexual activity by ninth grade, see **Evaluation of Programs**.

Parental consent for abortion and the judicial bypass option in Arkansas: effects and correlates, see **Law and Policy**

Parents' beliefs about HPV vaccine are correlated with teenagers' initiation, Digest, p. 65.

Parents' perspectives on talking to preteenage children about sex, Wilson EK, Dalberth BT, Koo HP and Gard JC, p. 56.

Partner age differences, educational contexts and adolescent female sexual activity, Koon-Magnin S, Kreager DA and Ruback RB, p. 206.

Pregnancy intentions and teenage pregnancy among Latinas: a mediation analysis, Rocca CH, Doherty I, Padian NS, Hubbard AE and Minnis AM, p. 186.

Reframing research on adolescent sexuality: healthy sexual development as part of the life course, Roundtable, Halpern CT, p. 6.

Running away linked to sexual initiation, FYI, p. 5.

Sexual intercourse and oral sex among public middle school students: prevalence and correlates, De Rosa CJ, Ethier KA, Kim DH, Cumberland WG, Afifi AA, Kotlerman J, Loya RV and Kerndt PR, p. 197.

Sexual values and risky sexual behaviors among Latino youths, see **Sexual Behavior**.

The association of socioemotional problems with early sexual initiation, see **Sexual Behavior**.

The cost of prevention, FYI, p. 145.

The HPV vaccine may be underutilized by certain subgroups of insured youth, see **STDs**.

Theory-based abstinence-only intervention may delay sexual initiation among black urban youth, see **Evaluation of Programs**.

What's in a label? Not nearly enough, FYI, p. 5.

Withdrawal attitudes and experiences: a qualitative perspective among young urban adults, see **Withdrawal**.

Withdrawal

Withdrawal attitudes and experiences: a qualitative perspective among young urban adults, Whittaker PG, Merkh RD, Henry-Moss D and Hock-Long L, p. 102.
